EXPERIENCE

April 2020 • Jun 2022

Lead Dev Mobile C# @ **TEKenable Ltd (formerly Greenfinch Technology)** - *Dublin, Ireland & Paris, France since October 2020*
Lead Dev on mobile app project using Xamarin.Forms. Responsible of App Store / Azure Cloud deployments, Azure DevOps (CI/CD), onboarding, code review, and supporting management on planning product development, timelines and budget. Take part in Solution Design and Business analysis with client/end users. Define uses cases, architecture, deployment strategy and estimations. Tools: Azure Functions, Docker, .NET Core & .NET 6

Jul 2019 • Mar 2020

JAVA/C# Software Developer @ **Greenfinch Technolgy** - *Dublin, Ireland*
Web and Mobile Development mainly in C#: Xamarin Mobile App, ASP.NET Core for API backend and front end in Angular. Some Java Web development as well: Java 8, Spring, Hibernate, MySQL, Mockito/JUnit. Tools: Github, Jira, Azure DevOps CI/CD.

Mar 2019 • Jul 2019

C# Software Developer @ **IMEC Technologies** - *Dublin, Ireland*
Mobile development using Xamarin and web using ASP.NET to build Android, Windows and iOS application with a C# codebase. Continuous Integration using GIT and Azure DevOps services. MVVM patterns to unit test the UI. Setting up CI and CD pipelines in Azure DevOps.

Sep 2018 • Oct 2018

English Teacher as Volunteer @ **Lyli Association** - *Siem Reap, Cambodia*
In the school build by the association in 2015, I taught English to children from 8 to 16 years old and raised funds for the school and students.

Aug 2015 • Aug 2018

Project Manager Assistant @ **BNP Paribas** - *Paris*
FIRST YEAR - JAVA, Full Stack developer
Working environment:
- AGILE SCRUM methodology
- Spring MVC as J2EE Framework, Hibernate as ORM and Thymeleaf and JS for the front
- Continuous Integration (CI) with tools such as GIT, Jenkins, Maven, Nexus

My responsibilities were:
- User Story evaluation and development
- Use Case design and test automation
- Bug fixing and maintenance of implementing code

SECOND YEAR - Business Analyst, Operational risks, IS redesign program
- Create, Update and challenge the backlog, user stories and MVP
- Plan and facilitate users workshop
- Define business process and mockup

THIRD YEAR - Project Manager for a web application
- Steering, monitoring and coordination of the project
- Estimate budget, risks and planning

I learn to be rigorous and adaptable to technologies and new protocols. My relational abilities and my taste for teamwork allowed me to solve difficulties and learned from my mentors.

Jun 2015 • Aug 2015

Internship, PHP/MySQL Developer @ **Multimedia Automatique Diffusion** - *Paris*
Participation in analysis and drafting of needs, writing technical specifications details, application design and development (Symfony Framework)

Jul 2014 • Aug 2014

Child support @ **Temps Jeunes association** - *Paris*
Organization of departure and return of children from vacations

---

EDUCATION

2015 • 2018	**Engineer's degree in computer science and application** @ **ESIEE PARIS** - *Paris*
	Three years in Dual apprenticeship system. Specialization on 3D Engineering with a lot of C# development with .Net and Unity framework.
2017 • 2018	**Master program majoring** @ **Beijing Jiaotong University (BJTU)** - *Beijing, China*
	A student exchange where I studied Chinese Mandarin and software engineering
2013 • 2015	**Technical University Degree in Computer science** @ **University Institute of Technology MLV** - *Paris*

PROJECTS

Sep 2017 • Jan 2018	**Twitter-like in Python / Flask framework** (Link to project)
	A twitter-like website made with Flask (python framework), PostgreSQL and Bootstrap. I organized with an AGILE method and GIT (you can see my dashboard here). It was made during my year in BJTU and was a success with the highest note.
Sep 2016 • Jun 2017	**Microsoft HoloLens Project / Unity C#** (Link to project)
	Augmented Reality gaming Project conducted within ESIEE Paris for Artefact Event. Artefact Event has a HoloLens and wanted a gaming experience covering specific needs.
	The project combines QR code detection, voice recognition, environmental control (room scan), Unity... Combine all the technologies and adapt to the young HoloLens software were the most significant challenge we faced. We used Git and the HoloLens community to overcome these difficulties.
Feb 2016 • Mar 2016	**Website - Empty House** (Link to project)
	I made the website, from conception to deployment through design and development. Website in HTML5 / CSS3 and JQUERY with the use of the CSS framework Materialized. I learn to deploy online a website, and I had to implement some code to simplify my update of the website.
Nov 2014 • May 2015	**Android Wi-Fi mapping application**
	As part of the search for white areas in a space, we created this application to model and mapped the Wi-Fi signals that you receive with your Android smartphone. We did a lot of research on how to improve the algorithms and the performance of the app.

LANGUAGES

FRENCH
Native speaker

ENGLISH
Highly proficient in spoken and written
English **(C1)** • **TOEIC®** score: **905**

CHINESE MANDARIN
Basic communication

PROFESSIONAL SKILLS

- **Certification TOEIC®** with a score of 905

PROGRAMMING LANGUAGES	TECHNOLOGIES
C#	.NET CORE & .NET 6
JAVA	XAMARIN
JAVASCRIPT	AZURE CLOUD & DEVOPS
PYTHON	ANGULAR
SQL	SPRING BOOT
	DOCKER / GIT

MISCELLANEOUS

- **Driving License**
- **Musician from 2014 to 2018**

I manage my music band and took care of the organization for four years. We released two albums and made more than thirty lives across France and England.

- **Fitness and climbing**
- **Asia**

Passionate about Asian culture and travel, I loved getting out of my comfort zone and organizing my trips for me and my friends across 8 Asian countries.
